

Kaden

Cordele

In July 2020, Kaden was riding on a motorcycle with his older brother when a tractor pulled out in front of them. The motorcycle swerved and landed in a nearby ditch. Kaden was severely injured and immediately taken by helicopter to the Beverly Knight Olson Children's Hospital. During his 21 day stay in the Pediatric Critical Care Unit, Kaden underwent six surgeries and was on life support for fourteen days. "I was so impressed with the staff," recalls Latoshia, Kaden's mom. "The team approach was awesome! Everyone made us feel like we were the most important patient in the children's hospital."

Today, Kaden attends Physical Therapy, and his energy is starting to fully come back!
